## Massage Techniques

For each massage area, make sure you familiarize yourself with the ReduSculpt, remember always massage towards the direction of the heart, after each massage movement upwards (press the force release button) and start another movement.

You will need to adjust and get familiar with the suction speed level, and adjust to a comfortable speed.

If you want to treat several parts of your body, always start from the upper part that you want to treat and follow from the top to the bottom. Used in the motion indicated in the images below and respect the suggested times apply every other day until you are satisfied with the results. Afterwards, you can use the device every other week to gain slimness in inches.

Do not use the device directly on varicose veins, or after a vein operation or surgery. Always we recommend consulting your doctor before using this device. Enjoy the treatment as often as necessary. To maintain the desired results in your legs, continue use at least once a month.

After massaging any specific area please massage softly with hands by applying circular massage motion on the area treated.

## Maintenance and Storage:
